

Amendments to the claims:

Claim 1 (Previously presented): A method for selling products over an electronic network, wherein said steps of said method are performed by a seller computer that electronically communicates with a buyer computer via the electronic network, said method comprising the steps of:

identifying a user;

transmitting a user specific order entry form to the buyer computer, said order entry form comprising at least one user specific product, a user specific price for said at least one product, and a quantity entry field, wherein said user specific order entry form comprises a user specific purchase history form comprising all products that were purchased during a specified time period, and wherein said quantity entry field is the only field on said user specific order entry form in which entry of data by said user is required to purchase said at least one product;

receiving a quantity of at least one product entered into said quantity entry field by said user and sent from the buyer computer;

transmitting a shopping cart to the buyer computer, said shopping cart comprising each of said at least one product selected by the user; and

receiving an instruction from said user to process an order from the buyer computer.

Claim 2 (Currently amended): The method as claimed in claim 1 wherein said step of transmitting a user specific order entry form comprises transmitting a user specific order entry form that further comprises an internal part number associated with at least one previously ordered product.

Claim 3 (Cancelled)

Claim 4 (Cancelled)
